INDEX					
S.No	**Date**	**Program**	**Page No**	**Marks**	**Signature**
1.	24-06-2026	Implement the functions using Math library	1		
2.	30-06-2026	Create and manipulate multidimensional arrays using NumPy	4		
3.	04-07-2026	Perform statistical functions using Statistics library	8		
4.	09-07-2026	Dataframe implementation using Pandas	10		
5.	13-07-2026	Handling the missing values in a dataset	14		
6.	16-07-2026	Load a dataset and perform the Data analysis	17		
7.	21-07-2026	Load a dataset and display its structure with Statistical summaries using Pandas	20		
8.	25-07-2026	Load a dataset and display its structure with graphs using Pandas and Matplotlib	22		
9.	30-07-2026	Perform Visualization using Seaborn	25		
10.	03-08-2026	Implementation of Covariance and Correlation	28		
11.	06-08-2026	Perform Normalization in a given dataset	31		
12.	10-08-2026	Perform feature selection using Extra Trees Classifier	34		
13.	17-08-2026	Analyze the dataset using Julius AI	37		
14.	22-08-2026	Analyze the dataset with dashboard using Bricks AI	39		
15.	27-08-2026	Perform feature extraction using Principal Component Analysis	41		
16.	01-09-2026	Implement KNN classification algorithm for an iris dataset using scikit-learn	43		
17.	07-09-2026	Home Price Prediction using Linear Regression for error based learning	45		
18.	10-09-2026	Perform SVM Classification using scikit-learn	48		
19.	15-09-2026	Implement Decision tree algorithm for an elective dataset	50		
20.	19-09-2026	Implement Random forest algorithm with customer churn dataset	53		
21.	22-09-2026	Perform Naïve Bayes Classification for loan dataset using scikit-learn	56		
22.	28-09-2026	Customer Segmentation based on Annual Income using K-means algorithm	58		
23.	01-10-2026	Perform E-mail Classification using Levity	60		
24.	06-10-2026	Implementation of image classification using Teachable Machine	62		
MODEL EXAMINATION					
25.	14-10-2026	**Model Examination**
